# ADITYA MOTALE

https://adii.fyi

hello, my name is Aditya — an engineer by choice

## > ABOUT

Engineer by choice. Passionate about systems programming, database architecture, and low-latency design. I learn fast, love hand-crafting reliable codebases, and obsess over micro-optimizations. Right now, I'm building embedded storage engines and speeding up mundane routines using SIMD.

github / twitter / linkedin

## > PROJECTS

turbofox — A persistent and efficient embedded KV database
frozen-core — Core utilities for frozen codebases.
ashwa — Hardware accelerated routines for single substring search.
kosa — A reliable page-based storage engine with fire-and-forget durability semantics
anvaya — Fast and lightweight Sanskrit lexical and syntactic analyzer

## > EDUCATION

degree: B.Tech (CSE)
major: Computer Science & Engineering
inst: Marathwada Inst. of Technology
period: Jun 2020 – Jun 2024 (4 yrs)
status: Graduated
place: CPSN, Maharashtra, Bharat

## > EXPERIENCE

### [ OSS Contributions ]

Sep 2024 — Present

role: Core Maintainer & Systems Developer
repos: turbofox · frozen-core · website · ashwa · kosa
stack: Rust · SIMD · Embedded Storage · Systems Programming
impact: Building hardware-accelerated algorithms, embedded KV stores & storage engines

### [ Freelance & Contract · Web & Tooling ]

Jul 2024 — Present

role: Web & Tooling Developer (Multiple Clients)
stack: Astro · React · TypeScript · Microservices · VS Code API
impact: Shipped startup landing pages, SMTP microservices & event ticket booking

### [ Internships · Mobile Engineering ]

Nov 2021 — Apr 2024 (9 mos total)

orgs: kraftbase (1 mo) · Rojgary (5 mos) · FOLKDevelopers (3 mos)
stack: Flutter · Dart · State Management · REST APIs
impact: Built MVP mobile apps for multiple clients from scratch, refactored codebases & enhanced reliability

## > WRITING

There's More to Performance Than Big-O — 15-09-2026
